## **Proposal for Adjusting NCR/Central Office Shuttle Route**

Beginning in October 2010, the ARRA renovation of the GS Building at 1800 F Street, NW will relocate many of the current tenants. In addition to the tenants that will be relocated to the NOMA building near New York Avenue, offices for the White House Service Center and Design and Construction Division will also be moved 4.5 blocks away to 1717 Pennsylvania Ave, NW. Because the White House Service Center and Design and Construction are divisions within NCR, their associates use the NCR/Central Office shuttle daily. After moving to 1717 Pennsylvania Ave, it is unlikely that these associates will use the shuttle pickup at 1800 E Street, NW. Instead, they will use the nearby Farragut West Metro Station incurring additional Metro expenses.

The White House Service Center would like to propose a change to the existing NCR/Central Office shuttle route that would include adding a shuttle stop at 17<sup>th</sup> and Pennsylvania Avenues. This stop would service all 200 members of the White House Service Center who are located at nearby office buildings including: 1717 Pennsylvania Ave, 725 17<sup>th</sup> Street, and 1650 Pennsylvania Ave. It could also accommodate the small Design and Construction office that will also be located at 1717 Pennsylvania Ave. We would only request a momentary stop, similar to the stop outside the ACOG building that accommodates the Triangle Service Center. Also like the ACOG stop, it would only need to stop every 40 minutes – on the way from Central Office to ROB.
